

You would do anything for your baby...

So would we.

Henry Mayo has built a state-of-the-art Neonatal Intensive Care Unit (NICU) which will give expectant mothers in Santa Clarita a full range of maternity services and provide the highest level of care to the tiniest of patients.

Construction and technology for the new **\$6 million** NICU is being accomplished with the assistance of philanthropy. Raising **\$3 million** of the **\$6 million** cost is a challenge that will be met by a caring community.

The Foundation and Hospital boards are pleased to honor generous philanthropists with the opportunity to name prominent NICU areas.
